The Tennessee Division of Air Pollution Control (TDAPC) has received a request for construction and/or modification of an air contaminant source as noted below. The proposed construction and/or modification is subject to part 1200-03-09-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mrs. Michelle W. Owenby, Director, Division of Air Pollution Control Division, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 15th Floor, Nashville, Tennessee 37243, within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Any individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten (10) days prior to the end of the public comment period to allow time to provide such aid or service. Contact the Tennessee Department of Environment and Conservation ADA Coordinator 22nd Floor, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, Nashville, Tennessee 37243, (866) 253-5827 (toll free) or (615) 532-0200. Hearing impaired callers may use the Tennessee Relay Service, 1 (800) 848-0298.

The applicant is Bodine Aluminum Inc. with a mailing address of 100 Cherry Blossom Way, Troy, MO 63379. They seek to obtain an air contaminant permit (Division identification number: 57-0284-12/77160) for construction of a new Aluminum Casting Line at 301 James Lawrence Road, Jackson, TN 38301. This proposed operation would consist of four electrically heated Aluminum Holding Furnaces, four High-Pressure Die Casters, four Finishing Cells, and two Shot Blast Stations. Baghouse control would be used for the Shot Blast Stations. There would be no control for the Holding Furnaces, Die Casters, and Finishing Cells. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. G. Forte is the assigned Division person.
